

PAC Tour Cycles A Million Miles for ALS

Lon Haldeman and Susan Notorangelo are working with area ALS Chapters to form a fund in the name of their daughter Ericka Notorangelo Haldeman who passed away from infantile Lou Gehrig's Disease.

The purpose of the fund is to raise money to find a cure and to bring awareness to ALS. This disease can affect men and women of all ages. Life expectancy after being diagnosed is one to 10 years. Currently there is no cure for ALS. There is no profile of who will get the disease regardless how healthy you are.

The goal of the Ericka Notorangelo Haldeman Fund is to raise \$100,000 for ALS research during the next four years. During a typical PAC Tour season riders will accumulate about 250,000 miles of event miles traveled. Our goal it to raise 10 cents per PAC Tour mile or about \$25,000 per year. Riders can make a voluntary donations directly to the ALS Chapter in the name of the Ericka Notorangelo Haldeman.

Donations amounts will vary from \$50 for 500 miles ridden at Desert Camp to \$300 for a cross country tour. PAC Tour riders not riding a tour with us this year are welcome to donate as well. 100% of all donations will go directly to the ALS Chapter.

Ericka passed away February 15, 1992. During her short life she traveled with PAC Tour on the Ridge of the Rockies, The Race Across America and the Southern Transcontinental Tour.

Your donation in memory of Ericka Notorangelo Haldeman benefits research through The ALS Association. On their website you can see current donors and the progress the fund has made.
